

Notes from Text

Acknowledgement of support outside charter to SO, TSS, L. O.

Staff Communications most important - must not be neglected by other.  
Other work (especially 61 type) shouldn't be done to damage of staff comm.

25X1A6a Page 29 - Error - [REDACTED] does not report to D/CO thru O & T. Also should  
25X1A6a possibly be noted Chief [REDACTED] is Chief of Station.

25X1C4a Page 46-47 - Mention of lack of quid pro quo for services [REDACTED] - Does not  
25X1C4a mention t/c processing [REDACTED] world-wide.

Page 73 - Overseas expansion program questionable. Need for rotation locations  
not sound justification.

Page 76 - IG doesn't agree w/establishment separate units for security of  
projects - questions establishment of SPD.

Page 82 - OC grade structure compared other Agency units is inequitable.  
In DD/S only Audit & Mgt have fewer super grades (OP & Comp each  
has 4 on duty) Agency average 8.8, OC 8.1 (OTR 8.8, OL 7.1)

Page 86-88 - Budget - OC work good - responsibility however should be in  
OC-A not P & P

Page 95/6 - Senior Admin from OC or DD/S????

Page 96 - 98 - Office of Director - no need for special assistants now.

25X1A2d1 Page 97 - Statements on [REDACTED] not accurate

25X1C Page 98 - Registry dood but needs space.

25X1A6a [REDACTED] - Support capability - exceeds requirements of DD/P by much???

[REDACTED] - past problems largely due to personality conflicts  
Overtime not excessive - Project by CIA justifiable since NSA can't

25X1A6a go into [REDACTED] ???

25X1C

25X1A6a [REDACTED] - [REDACTED] situation not too accurately stated. Action underway to [REDACTED]  
25X1A whole staff again. Little control by C/S on t/c coming from his Office.  
D/CS has good control

25X1A6a In [REDACTED] and all other stations visited, case officers use cable rather than dispatch(a) to get wide distribution and (b) impress importance of msg. Speed not necessarily a factor.

25X1A6a Chief [REDACTED] position appears warrant GS-16

25X1A6a Travel TDY [REDACTED] excessive and should be reduced.

25X1A6a [REDACTED] -

25X1A6a [REDACTED]

Dwelling can be set up in 7 days

TSS lacks competence and tech skill so OC has to support.

25X1A [REDACTED] Should be reviewed by DD/P to get accurate calculation of cost and realistic appraisal of effectiveness to determine if continuation justified. Weigh against other work which 18 OC personnel involved might do. (This not made as formal recommendation, Why?)

25X1A6a [REDACTED] - tfc declining. Staff more than adequate. Chief of Station against inde-

25X1A6a pendent command authority of [REDACTED] and OC. Wants authority to pass on promotions, assignments and reassignments. Chief of Station against tfc pattern which doesn't give laterals e.g. [REDACTED] 25X1A6a

25X1A6a [REDACTED]

Releasing officer instructions should be reviewed - cables often verbose and unnecessary.

Support to TSS should be limited.

25X1A6a

[REDACTED] station personnel use cable system to large extent unnecessarily. Little control effort by Chief of Station and officers.

25X1A6a [REDACTED] capability xxxxxxxxxxxx

25X1A6a [REDACTED] war ops OC personnel to be commended.

OC Supply system far more efficient than general Agency system.

25X1A6a Integrity of OC supply system should be preserved and it should not be amalgamated as pertains to [REDACTED] with log support system run by [REDACTED] Support Station.

25X1A6a [REDACTED] - closer control by [REDACTED] appears needed. Insufficient justification for both Ops officer and Training Officer. 25X1A6a

Page 154-158 - Overextension:

155 - Agency can't afford deterioration staff communications system - special projects, volume of traffic, marginal operational activities. "Service" philosophy laudable but some evidence requirements accepted without full appraisal of effect on total capabilities.
